

# cSURVEY

character insights for growth  
by characterplus

Over the last three decades of positively impacting school culture and climate, CharacterPlus has become an evidence-based leader in assessing the critical factors that lead to great schools. CharacterPlus is now offering our Qualtrics-based Culture and Climate Survey platform to administrators in their quest to better understand where excellence can be attained in their school or district.

## Student Summary 357 Responses

## Our cSurvey is MSIP6 aligned!

The school report will now include a separate page that isolates **the three essential items** LEAs must ask their stakeholders:

The school system assures student voices are heard and respected. *This item should appear in the older student, parent, and staff survey.*

The school system provides school culture and climate data and reports periodically to all stakeholders. *This item should appear in the parent and staff surveys.*

Educator teams address positive classroom learning environments. *This item should appear in the staff survey.*

cSURVEY questions are age/participant appropriate and thoughtfully brief. Participation rates are high on our mobile-friendly platform, and cSURVEY is customized with your school name. The CharacterPlus results report allows a school team to easily see gaps in perceptions between all stakeholder groups surveyed: students (third grade and up), staff, and parents/guardians.

## cSURVEY CATEGORIES

- Feelings of Belonging
- Sense of School as Community
- Sense of Autonomy and Influence
